

# Muhammad Musfer

## Software Engineer

Highly skilled Full Stack Engineer with over 3 years of expertise in JavaScript-related technologies, specializing in the MERN stack. I have successfully worked on diverse web and mobile development projects. Throughout my career, I have successfully delivered complex projects, optimized performance, and built robust, scalable solutions. I am deeply passionate about creating innovative and user-friendly applications and thrive in dynamic, collaborative environments. With a strong foundation in web and mobile development, I am well-prepared to contribute to your team's success in delivering cutting-edge, full-stack solutions.

## WORK EXPERIENCE

### Devsinc

#### Software Engineer

August 2021 – Present

- Played a pivotal role in the development and maintenance of VeVe, an NFT marketplace, initially as a Front-End Engineer and later as a Full Stack Engineer.
- Collaborated with cross-functional teams to develop and maintain web applications using the MERN stack.
- Designed and implemented user-friendly front-end interfaces, ensuring a seamless user experience.
- Developed and maintained server-side APIs using Nest.js and GraphQL, optimizing performance and scalability.
- Utilized Redis cache to enhance application performance.
- Participated in code reviews to maintain high-quality code and adhere to best practices.

### Techno Soft6 months

#### Associate Software Engineer

- Collaborated in the development of web applications using React Js.
- Assisted in designing and implementing front-end interfaces to enhance user experiences.
- Contributed to server-side development, optimizing code for performance and scalability.
- Participated in troubleshooting and resolving technical issues to ensure application functionality and reliability.
- Engaged in code reviews to maintain high-quality code and adhere to best practices.

## PROJECTS

### VeVe NFT Marketplace

- Collaborated on the development of a feature-rich NFT marketplace, contributing to both front-end and back-end development.
- Implemented server-side APIs using Nest.js and GraphQL to optimize performance and scalability.
- Utilized Redis cache to enhance application performance and improve user experiences.
