## PERSONAL PROJECTS

### Ginkgo Retail (Django)

- Work on Updates and implementing new apis .
- Adding third party api of couriers in Project

### FYP - HIRE MAZDOOR (Django)

- A platform where you can hire physical labours and you can also provide your services. You can post your task and service providers will bid you to do your task full authentication system added. You can send messages to each other and you can chat on whatsapp through whatsapp api.

### Form Generation (Python | Mysql)

- Form generation project similar to google forms but with some other functionalities .My role is to develop backend apis in Flask . I used Python flask and Mysql database for backend .It contains almost 100 apis .

### Instagram Automation(Python | Mysql)

- This is about scraping data of Instagram public profiles for marketing purposes. My role is to gather data and make apis for dashboards
